# The Motivator.

New Philips Sonicare FlexCare+ motivates your patients to brush for improved gum health.

FlexCare+ is now the most advanced reason to recommend Sonicare. It offers new features specifically designed to motivate your patients to brush the way you want them to. The innovative features include a new Gum Care mode that prompts patients to brush for a full 3-minute cycle in areas that need more attention for improved gum health. With its invigorating clean and superior oral health results, FlexCare+ helps you put motivation in your patients' hands.

 the way to better

## BORA LED & PRESTIGE LED INNOVATION WITH STYLE

Imagine incredibly light instruments, refined, efficient and rugged at the same time.

Inspired by the latest technological breakthroughs in the most demanding environments, the Bora and Prestige BLACKLINE incorporate a carbon fiber handle. These tubines are incredibly light and therefore easier to handle. Moreover, the carbon fiber offers improved resistance to wear, friction, torsion and impacts. The two Blen-Air monobloc optical glass rods provide ideal distribution of the LED intensity. There is virtually no shadow area, offering a natural white light similar to daylight. The LED has a service life 10 times longer than that of a traditional light bulb.

Available with a metal or a carbon fiber handle, the powerful Bora and the miniature Prestige tubines set new standards in ergonomics, performance and durability.
